

MEMORANDUM

Sterling, Marsh & Associates LLP

TO: Lauren Sterling, Managing Partner

FROM: Marsha Drennan, Controller

DATE: December 31, 2024

RE: Year-End Matter Status Review — Collectibility and Engagement Modifications

Below are the matter-level events identified through the year-end matter management review that bear on the year-end closing position of unbilled work-in-process. The dispositions below have been approved by the responsible partner and partner-in-charge of billing.

Allerton Pharmaceuticals LLC (M-2024-0007)

The firm reached a partial settlement on December 20 with the client over outstanding fee matters arising from prior billing cycles. Under the settlement, the firm agreed to a 35% reduction on the closing unbilled work-in-process balance for this matter. The settlement documentation is filed in the year-end close package.

Mariposa Vineyards LLC (M-2024-0010)

On December 22 the responsible partner was informed that the underlying partnership has been judicially dissolved. The dissolution decree expressly provides that outstanding professional fees on the matter are released as a condition of settlement among the partners. The firm's unbilled work-in-process on this matter is no longer collectible.

Apex Robotics Inc. (M-2024-0022)

On December 19 the client withdrew its planned S-1 filing following adverse pre-clearance commentary from SEC staff. The client has confirmed in writing that it will pay 50% of outstanding professional fees attributable to the engagement; the remaining 50% has been approved as a year-end write-down.

Greystone Ventures LLC (M-2024-0021)

The engagement letter governing the ongoing portfolio management mandate was amended effective December 20 to install a cumulative fee cap of \$836,000 across the engagement. The cap is measured against cumulative gross fees billed under the engagement.

M.D.
